

Dear Alumni,

Shaheed Sukhdev College of Business Studies (SSCBS), eminent college of the University of Delhi (DU), has been encouraging entrepreneurship, innovation and a can-do spirit. Students from our college have made their mark in national and international field; we are recognized as a great learning institution by multiple agencies of national repute such as NAAC (Grade 'A') and India Today (Best undergraduate college in India for undergraduate management education in June 2020).

Among the renowned infrastructure of seven floors, the library is located at the second floor of the college. It is spread over two floors and has designated space for reading rooms for 218 students and research section for faculty members along with reprographic facility. The total library collection is 23,349. Apart from that, All college library activities are automated using the cloud based Open Source Solution i.e. KOHA. It provides easy access to the library catalogue (OPAC) from anywhere anytime. We are one of the leading college libraries of University of Delhi using KOHA Open Source Integrated library management software.

Moreover, in order to keep pace with the latest technology, SSCBS Library is planning to implement RFID technology (Radio Frequency Identification). RFID library management is easy and convenient. RFID can be used for library circulation operations and theft detection systems. RFID-based systems combine security with more efficient tracking of materials throughout the library, including easier and faster charge and discharge, inventorying, and materials handling. RFID system reduces the congestion at circulation system for both staff and students which results in better customer satisfaction. It saves the time of students as well as staff also. It is emerging more effective, time saving and convenient. RFID tags are much faster than the barcodes and contained much information than barcodes.

As you have been a part of this college and very well aware about the learning culture of the same So, in view of this, we appreciate your sponsoring this project whether individually or collectively to use this technology in our college library so that the students of our college will get the exposure to the state-of-the-art library which will help them in their lifelong learning. To expedite the process, we have invited quotations from five vendors from which ID TECH Solutions Pvt. Ltd. quoted the lowest price i.e. Rs. 15,75,000.00/- (Fifteen lakhs and seventy five thousand only).

If you sponsor this project, your name will get promoted and branded at a plaque in the library acknowledging your valuable support. For any further query, feel free to contact Librarian, SSCBS i.e. Ms. Deepti Khatri (deeptikhatri@sscbsdu.ac.in).

Looking forward for a favorable response

Thanking you

With regards,

Deepti Khatri
